Installing Windows

If you want to install Windows on your KVM VPS you need your F-Com Credentials and an VNC Viewer.

Please login into your F-Com Panel and selected the VPS you want to install Windows on.

Select "Boot from CD-Rom" in your settings tab.

Before confirming the boot from cd-rom make sure to connect with your VNC Viewer to your VPS.

After connecting confirm the cd-rom boot and switch back to your VNC Viewer.

When asked push any button to start your Windows Installation.
